Children are bombarded with hypersexualised messages from media and popular culture from a young age and the impact of pornography on adolescents is an ever-growing concern. But what can parents and carers do to navigate this difficult issue with their children?

Melinda Tankard Reist, an expert on building respectful relationships and the effects of pornography, will present the latest research on the impact of this current culture on our children and provide authentic strategies for parents and carers to help support and educate their children on this key area of their development. Questions from the audience will be invited at the end of the presentation.

Given the importance of this issue, the School strongly encourages all parents to attend.
