Appendix 1 - MYP Assessment Guidelines

St Andrew's Cathedral School delivers the NSW curriculum via the MYP framework.

All students commencing Year 7 undertake the Middle Years Programme (MYP) of the International Baccalaureate under the curriculum of NESA, an internationally recognised framework for learning, specifically designed for students aged 11 to 16, representing best practice in Junior Secondary schools. Students continue to follow the content of NSW syllabuses, while the MYP provides the framework for learning.

MYP assessment is different to more traditional ideas of assessment in that it is a criterion-based assessment. Credit is given to what they know and can do. Each subject has four criteria, each rated out of 8. Year 7 and 8 use the same criteria, so learning is seen as a continuum, with results expected to be higher in Year 8 than Year 7. Assessment tasks may contain two, three or four of these criteria.

An Assessment Notification is uploaded onto the School's learning management systems, Edumate and Schoology two weeks prior to the due date, along with the assessment criteria. Marks should not be totalled for an assessment but looked at in terms of what was achieved in each criterion. At the end of each semester, students will receive a report for each subject with the four MYP criteria and NESA outcomes. They also receive an overall MYP Grade out of 7, in line with the IB Diploma Programme, and a NESA Grade. On the report will be a Grade distribution graph to allow students and parents to see where a student is sitting in their cohort, and a teacher comment. Details of the assessment criteria is outlined below.

1. Every subject (Mathematics, English, Science etc) in Year 7 – 10 is assessed twice a year: once in Semester 1 and once in Semester 2.
2. Each subject is assessed in according to four assessment criteria – named A – D.
3. Each criterion is assessed out of 8 – i.e., 8 is the top grade and 1 is the bottom grade.
4. The grades from the four assessment criteria are put together to get a mark out of 32.
5. This then translates to an overall grade for that subject out of 7:
 - 28 – 32 = Grade 7
 - 24 – 27 = Grade 6
 - 20 – 23 = Grade 5
 - 16 – 22 = Grade 4
6. In the student's report, they are also given a comment on each criterion, i.e. what they did well and what they could do better.

The emphasis on assessment is on learning and progress as the criteria stay the same across Years 7 to 10. There are eight check-in points across the four years to track how the student is progressing in each criterion in each subject.
